FBI-King Section 33 Serials 3221-3332 238 pp released of the 116 documents

3229 Ninc pp B'ham teletype reinterview former MoPen prison on Ray. Says Ray had been in Alabama and knew of some Jefferson County taverns. This is the one of the so-called business men's association offer for the killing of King. OPR report. Negative on Ray and narcotics, including view Ray's arms.

3231 refers to Ray's having contacted paychiatrist in L.A. have not seen anything in this file on it.

3256 is confirmation of what former MoPen prisoner attributed to Ray as knowledge of cheap joints in Alabama near Warrior River, frequented by bargemen. Two of those interviewed at these joints claim to find picture Ray familiar, that he had been there, but no other info. In view of fact they knew of fat reward, not by itself credible. (me.)

3267 is first record I have seen with the Hoover initial that is not directly related to public image/press. It approves aitel to Legats asking for records kept on deceased to see if Ray is dead

3282, 5/11 to Legat, Canada, remind he has been advised to watch passports. If this had been done in the simplest way, by examining photographs of all passports issued beginning 4/4, they'd have spotted Ray before he left Canada.

3300 NO says several of phones called from Texas unlisted, require subpoena. Second document, same serial, authorizes grand jury subpoena.

3332, p. 12, relates to paper found inLA and on which names Ray and Riley were raised before Jimmy was identified by prints. Re Q128. Asking appears not to be as claimed, over 97)(C)(D). In particular does this seem to be impossible for all of the "results of an FBI Laboratory Report Dated April 19,1968," all but 2 lines of the page. Unless they use two lines on a page and then follow with the report. The one here following bears that date. But obliteration with paper, not marking through, is visible on 12. Staples for paper to hide the bottom of 19 are visible.

Q128 WITH THE RAY NAME WAS IN THE FBI LAB 4/12 OR SEVEN DAYS BEFORE THE CLAIMED FIRST IDENTIFICATION OF RAY BY FINGERPRINT. NO CHECK BY NAME, RAY, TILET, ETC.?
